

## 2930 - EPSDT SERVICES

**POLICY  
STATEMENT**

**The Early and Periodic Screening, Diagnostic, and Treatment (EPSDT)** benefit provides coverage for a comprehensive array of preventive, diagnostic, and treatment services for low-income infants, children and adolescents under age 21, as specified in Section 1905(r) of the Social Security Act (the Act). The EPSDT benefit is designed to assure that children receive early detection and care, so that health problems are averted or diagnosed and treated as early as possible. The goal of the EPSDT benefit is to assure that individual children get the health care they need when they need it. When a preventive health examination indicates the need for further evaluation of a child's health, the child should be appropriately referred for diagnostic and treatment services without delay. States are required to arrange for and cover under the EPSDT benefit any Medicaid covered service listed in Section 1905(a) of the Act if that treatment or service is determined to be medically necessary to correct or ameliorate defects and physical and mental illnesses or conditions. This includes physician, nurse practitioner and hospital services; physical, speech/language, and occupational therapies; home health services, including medical equipment, supplies, and appliances; treatment for mental health and substance use disorders; treatment for vision, hearing and dental diseases and disorders, and much more. This broad coverage requirement results in a comprehensive, high-quality health benefit for children under age 21 enrolled in Medicaid.

The EPSDT benefit is available for Medicaid-eligible children from birth up to twenty-one (21) years of age and PeachCare for Kids®-eligible children from birth up to nineteen (19) years of age.

**BASIC  
CONSIDERATIONS**

The EPSDT benefit allows for: an assessment of a child's health at key points in his/her life so that potential diseases can be prevented or detected early enough to allow for treatment, thus assuring continued healthy development and; tests, procedures and treatments when needed to correct or ameliorate diseases and conditions.

EPSDT providers include Physicians (pediatricians, family practitioners, general practitioners, etc.), Nurse Practitioners, Physicians' Assistants, Rural Health Clinics, Federally Qualified Health Clinics and Public Health Departments that are enrolled in the Health Check program.

The EPSDT program provides reimbursement for preventive and

primary health services, immunization administration, vision, hearing and dental screenings, and developmental screenings. Other Medicaid program areas reimburse providers for services provided under the EPSDT benefit.

EPSDT preventive health services align with the AAP's Bright Futures Periodicity Schedule and include, but are not limited to the following:

- A preventive health visit, which includes the following age appropriate components:
  - a comprehensive physical examination (unclothed to the extent necessary)
  - comprehensive health and developmental history
  - developmental assessment including mental, emotional and behavioral
  - alcohol and drug use assessment
  - depression screening
  - measurements, including BMI
  - anticipatory guidance and health education
  - dental/oral health assessment
  - vision and hearing screenings
  - nutritional screening
  - immunizations according to the Advisory Committee on Immunization Practices (ACIP)
  - certain laboratory procedures (including Blood Lead Level Screening)
  - TB and lead risk assessments
  - STI/HIV screening
- Other available services include:
  - notification to the Medicaid/PeachCare for Kids<sup>®</sup> member of necessary EPSDT Services
  - assistance with transportation arrangements
  - assistance with scheduling appointments
  - assistance in locating the nearest EPSDT provider
  - provision of information to the blind, deaf, illiterate or non-English speaking through suitable communication resources.

## PROCEDURES

Inform the applicant about the program verbally and in writing at the time of application for Family Medicaid.

Document in the system how the member was informed of the services available under the EPSDT benefit (i.e., face to face, telephone, brochure, or video).

Provide a copy of the current EPSDT brochure to the applicant during the personal contact or mail it to the applicant (Form 3327 – English, Form 3328-Spanish or Form 3329- Braille).

If brochures are unavailable, provide the following phone number for the nearest provider participating in EPSDT:

1-866-211-0950

Explain the benefits of preventive health care services and the services offered under the program including the following:

A. Benefits

- prevention of some diseases/disability before occurrence
- early detection can prevent disease/disabilities from progressing
- diseases/disabilities can be corrected if diagnosed and treated early
- early medical and dental intervention can help a child achieve his/her full potential.

B. Services – see listing above

C. Upon a determination of eligibility for Medicaid, all individuals under age 21 are eligible for the EPSDT benefit.

D. Upon a determination of eligibility for PeachCare for Kids all individuals under age 19 are eligible for the EPSDT benefit.
